

# PACIFIC COLOUR CHART

COLORBOND® ULTRA  
COLORBOND® XRW  
COLORCLAD®

The Pacific's harsh conditions demand building materials of the highest quality. Materials like COLORBOND®, are manufactured by New Zealand Steel for island life and proven to perform.

#### **MADE TOUGH**

Ongoing research and development has helped us create our toughest paint system ever, ensuring COLORBOND® will stand the test of time.

#### **A HEALTHY CHOICE**

COLORBOND® is made with lead-free paint systems. All products comply with the highest standards and all relevant codes.

#### **QUALITY COUNTS**

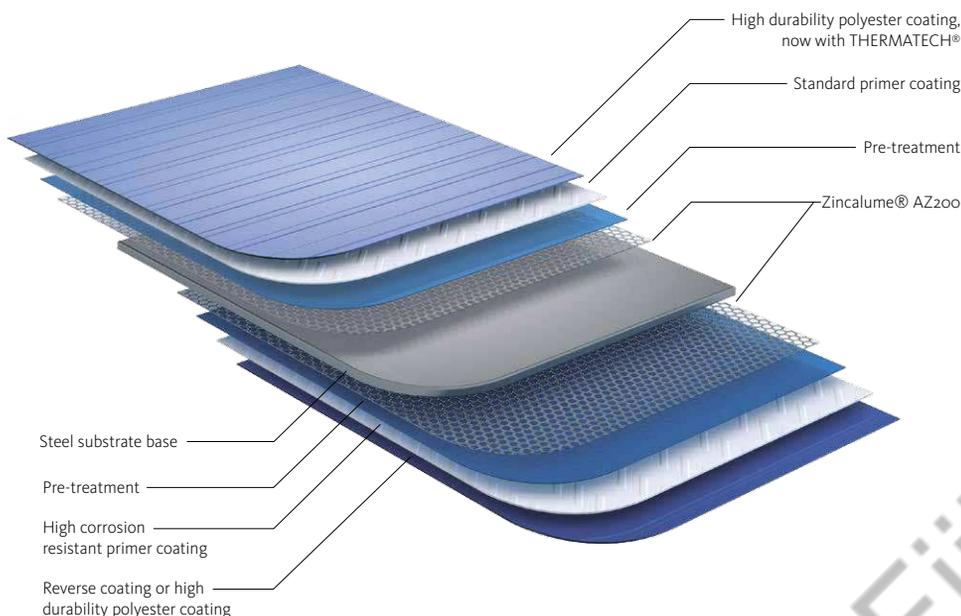

COLORBOND® is produced to the same strict standards as required in New Zealand and Australia, unlike lower value products which may be weaker or made from thinner steel.

#### **COLOUR THAT LASTS**

COLORBOND® uses unique paint formulations created specifically for the Pacific's variable climate and harsh UV rays, ensuring optimal colour performance.

#### **PROVEN OVER TIME**

For more than 30 years New Zealand Steel has been monitoring, testing and refining the performance of their products in harsh environments.

**VERY SEVERE**

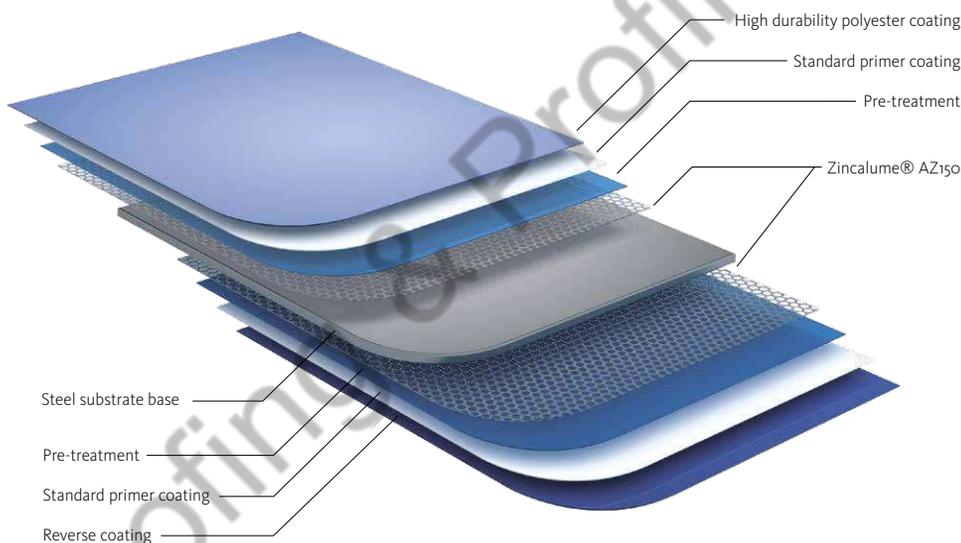

**10 years:** covering the paint surface against flaking and peeling.  
**12 years:** against perforation as a result of corrosion.

**SEVERE**

**15 years:** covering the paint surface against flaking and peeling.  
**15 years:** against perforation as a result of corrosion.

**MODERATE**

**15 years:** covering the paint surface against flaking and peeling.  
**20 years:** against perforation as a result of corrosion.

**SEVERE**

**10 years:** covering the paint surface against flaking and peeling.  
**10 years:** against perforation as a result of corrosion.

**MODERATE**

**10 years:** covering the paint surface against flaking and peeling.  
**10 years:** against perforation as a result of corrosion.

**ISO CATEGORY DESCRIPTIONS**

VERY SEVERE - ISO Category E	SEVERE - ISO Category D	MODERATE - ISO Category C
<ul style="list-style-type: none"> <li>Heavy salt deposits.</li> <li>The almost constant smell of salt spray in the air.</li> <li>Close to exposed coast lines (typically 50-200 metres).</li> </ul> <p>This environment may be extended inland by prevailing winds and local conditions.</p>	<ul style="list-style-type: none"> <li>Light salt deposits.</li> <li>A frequent smell of salt in the air.</li> <li>Typically 200-500 metres from exposed coastlines.</li> <li>In the vicinity of large expanses of calm salt water.</li> </ul> <p>This environment may be extended inland by prevailing winds and local conditions.</p>	<ul style="list-style-type: none"> <li>No obvious marine or industrial influences.</li> <li>Little or no salt deposits. The occasional smell of salt in the air.</li> <li>Typically 500-1000 metres from the coastline or more than 500 metres from industrial emissions or in the immediate vicinity of calm salt water.</li> </ul>

# Colorbond® Ultra

COLOUR FOR THE EXTREME

COLORBOND® ULTRA steel has been designed for the tough conditions encountered in the Pacific Islands. Perfect for everything from residential homes to commercial buildings both inland and coastal, it's a durable product that looks great and is made to last.

COLORBOND® ULTRA with THERMATECH™ technology reflects more of the sun's rays, helping to keep buildings cool in the summer, while its ZINCALUME® substrate provides greater corrosion protection and peace of mind.
